RADAMANTHUS BATNAG

SOFTWARE ENGINEER EXPERIENCED ON E-COMMERCE AND DEVOPS
HTTPS://RAD.BATNAG.ORG

SKILLS

I have 10+ years of Rails development experience and 5+ years of Devops experience.

I worked on various roles in and around a software team: Software Engineer, DBA, Devops, QA, Engineering Manager, and Customer Support.

CERTIFICATIONS

AWS Solutions Architect – Associate (2016)
ScrumAlliance Scrum Master (2009)
Sun Certified Java Programmer (2003)
IBM DB2 for Windows NT DBA (1998)

EXPERIENCE

INDEPENDENT DEVOPS AND RAILS CONSULTANT• BUDDYHUB • MAY 2022 – PRESENT
WWW.BUDDYHUB.CO.UK
I'm currently working with the founder and the CTO to build out the MVP service for the NGO. The most challenging feature at this point is the matchmaking feature – we need to match users to other nearby users. Nearby users are determined using Google Maps API calls, but this is expensive, and the API calls need to be minimized as much as possible.

SENIOR SOFTWARE ENGINEER (RAILS, REACT, GRAPHQL) • SHOGUN LABS • OCTOBER 2019 – AUGUST 2022
WWW.GETSHOGUN.COM
I worked on the Frontend product from 2021 to 2022, on these features: GitHub integration (synchronize code from GitHub to Frontend store), Store Copy feature (copy production store to staging store), and on a discovery spike for i18n. I also worked on performance optimizations and infrastructure improvements.

I worked on the PageBuilder product from 2019 to 2021. The last feature I worked on was the Unsplash integration, which allowed PageBuilder users to easily add Unsplash images into their e-commerce site.

SENIOR SOFTWARE ENGINEER (RAILS, EMBERJS, REST) • TRADEGECKO • AUGUST 2018 – OCTOBER 2019
WWW.TRADEGECKO.COM
I worked with the systems team to tackle common platform issues on performance, stability and scalability. I also worked with the Customer Support team to investigate and provide solutions to ongoing customer issues.

BATNAG-618765248

INDEPENDENT DEVOPS AND RAILS CONSULTANT • APRIL 2018 – AUGUST 2018

Provided performance and cost optimization review for clients' existing AWS infrastructure.

APPLICATION SUPPORT ENGINEER • ENGINE YARD • 2013 – APRIL 2018
WWW.ENGINEYARD.COM

Worked as an external devops engineer for customers running Rails, PHP and Node.js applications on the Engine Yard platform. Concurrently worked as the lead developer and maintainer of chef recipes for setting up Redis, Sidekiq, Elasticsearch, Solr, and other related software on the Engine Yard platform.

SENIOR SOFTWARE ENGINEER (RAILS) • AELOGICA • 2011 – 2013
AELOGICA.COM

Mentored junior developers and started the company's internship program.

SENIOR SOFTWARE ENGINEER (RAILS) • EXIST SOFTWARE LABS • 2010 – 2011
EXIST.COM

Worked as a developer on an in-house startup project (Infinite.ly – social presence manager) and as a Rails architect for an outsourced project for Telmate (telco services for correctional facilities).

SENIOR SOFTWARE ENGINEER / ENGINEERING MANAGER (RAILS, JAVA, AWS) • DEVEX • 2004 – 2010
DEVEX.COM

Managed the J2EE development team, built up the Rails and AWS sysops teams. Led the transition of the web service from J2EE running on managed hardware to Rails running AWS. Mentored junior developers and new hires transitioning to Rails.
